EXPERIENCE

- **2023 - now** **Freelancing on UpWork and Fiverr.**
I took on jobs involving very interesting projects, the latest being manual testing for the company **Neaxis**. I tested mobile services, their proper subscriptions, and functionality, and also prepared reports on test results.
- **2021 - now** **Building custom PCs.**
Selected and ordered computer components according to the client's specifications, assembling the computer while adhering to safety guidelines and ensuring a proper appearance. I installed software based on Windows or Linux and tested the PC's functionality to ensure smooth operation.

PET PROJECT

1. **Functional Testing of GitHub and Facebook with Postman, Selenium, and PyTest**
2. **Platformer made in PyGame where the player controls a zombie in a world teeming with humans.**
3. **Application for vending machines written in Flask is a simple web service that enables the management of vending machines through a web browser.**
4. **Telegram Bot for Polish animal shelter**
5. **Telegram Bot designed to retrieve data from websites and publish it in a Telegram group**
